MANUFACTURING INC.

At Southern Craft Manufacturing, we are dedicated to creating the finest quality and greatest value products in the industry. We blend old world craftsmanship with modern manufacturing techniques to create a full line of 20 gauge steel, 18 gauge steel, and brush finished caskets in a multitude of styles. An assortment of hardware designs and over 30 colors provide virtually limitless combinations.

Contained in this latest catalog are Southern Craft's newest offerings. We have invested in the hardware molds that are shown in this book to ensure a continuous supply of materials needed to produce these models.

Rodney and Tina Robinson founded Southern Craft Manufacturing in April of 1994. Their family works together with more than 100 coworkers to manufacture an authentic American made product. Loretto, Tennessee has long been known for quality casket producing capabilities and the Robinson family has continued this legacy by partnering it with their fourth generation casket making skills. Our full service trucking operation can fill your distribution needs nationwide.
